Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicant's amendment dated January 18, 2005, has been fully considered.

Applicant has argued Drakesmith et al does not disclose "not fully halogened" ether compounds. The Examiner strongly disagrees. Please note column 1, lines 10-15, Drakesmith clearly discloses that the fluorinated ether may be partially or fully fluorinated. Also, the newly added limitation "not fully halogened" is not found in Applicant's specification, even on page 5 as argued by Applicant. Thus, that constitutes new matter and a new ground of rejection.

Applicant has also argued the reference fails to disclose the organic fluid in the dependent claims. Please note Applicant has put many compounds inside parentheses. Thus, it's unclear if the terms/phrases inside parentheses are parts of the claims. Applicant is required to remove the parentheses if he wants to claim those terms/phrases.

The 102 rejection has been maintained for claims, 1, 7, 14, based on Drakesmith et al, and a 103 rejections have been made for all dependent claims.

Claims 1-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to

Art Unit: 3748

one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The newly added limitation "not fully halogened" is not found in the specification. Please point out where in the specification said phrase can be found.

Because Applicant's amendment necessitates a new ground of rejection, this Office Action has been made final.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7, 14, are rejected under 35 U.S.C. 102(b) as being anticipated by US 4736045 (Drakesmith et al).

Drakesmith et al discloses a Rankine cycle using organic fluid which may be butyl methyl ether or other similar working fluid (note column 15, lines 45-68).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-6, 8-13, 15-19, are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 4736045 (Drakesmith et al). Drakesmith et al discloses all the claimed subject matter as set forth above, but does not disclose different types of organic fluids as claimed. However, Official Notice is taken that changing working fluid is well known in the art. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to select different types of organic fluids as claimed in the system of Drakesmith et al for the purpose of achieving appropriate work outputs based on the special characteristics of the fluid.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

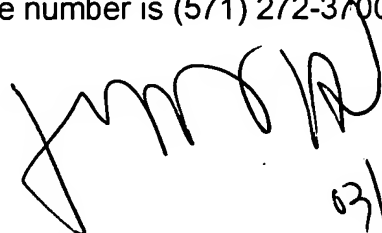

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
